

Marlena Fejzo

Bio

Marlena Fejzo is a women's health scientist who has published peer-reviewed articles on many diseases of women including ovarian and breast cancer, multiple sclerosis, and discovered the first genes for uterine fibroids, nausea and vomiting of pregnancy (NVP), and Hyperemesis Gravidarum (HG). Fejzo is an Assistant Professor at the University of Southern California, Chief Scientific Officer of The Morning Sickness and HG Clinic, Research Director and Board Member of the HER Foundation, Board Member of the Foundation for Women's Health, and an advisor for NGMBio. Fejzo is a 2024 Time Woman of the Year and Time 100 Health Honoree, received the National Organization of Women Victoria Mastrobuono Award in Women's Health, Forbes 50 Over 50 award in Innovation, Falling Walls Breakthrough of the Year Finalist, and BII & Science Translational Medicine Prize for Innovations in Women's Health winner. She suffered from HG in 2 pregnancies.
